

MULTIFUNCTIONAL ELECTRICAL INSULATION

IMPROVE YOUR BATTERY EFFECTIVENESS

Use of Nitto electrical tape will protect battery systems against short circuit to ensure passenger safety: High bond performance answers to the next challenge of cell to car design, high purity polymers contribute to battery cell lifetime optimization, high thermal conductivity contributes to effective thermal management of battery systems.

Electrical insulation

High cleanliness

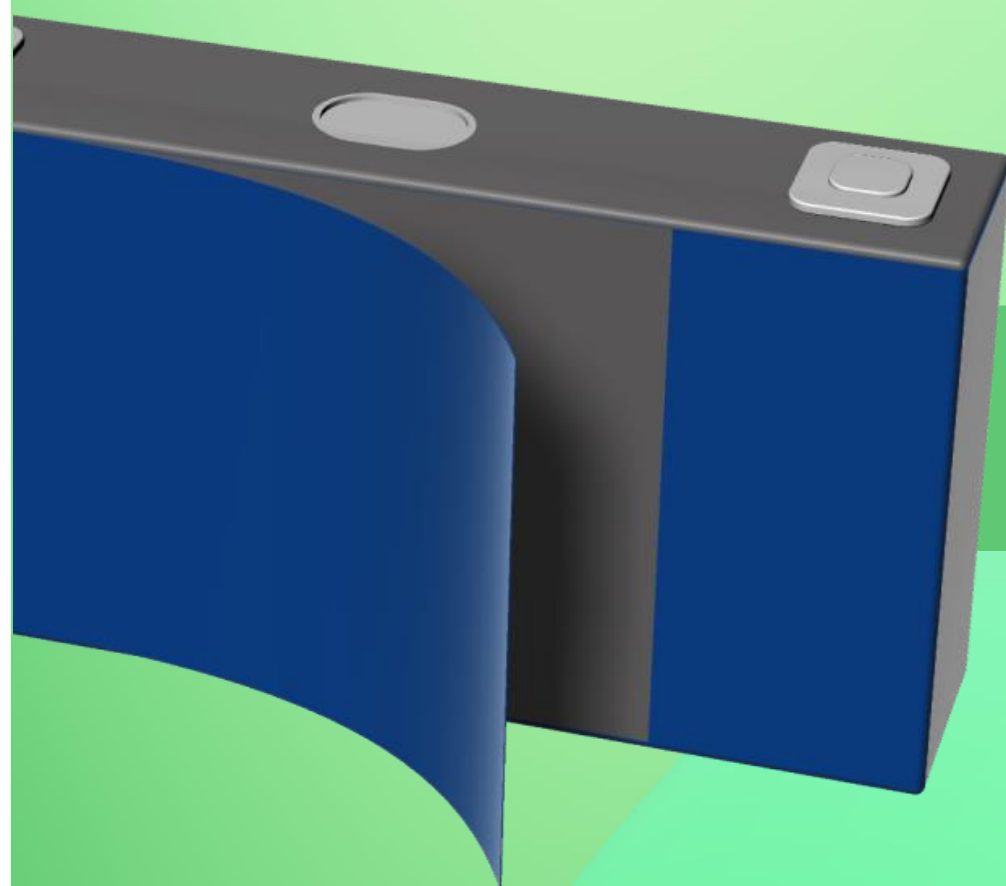

Different thicknesses

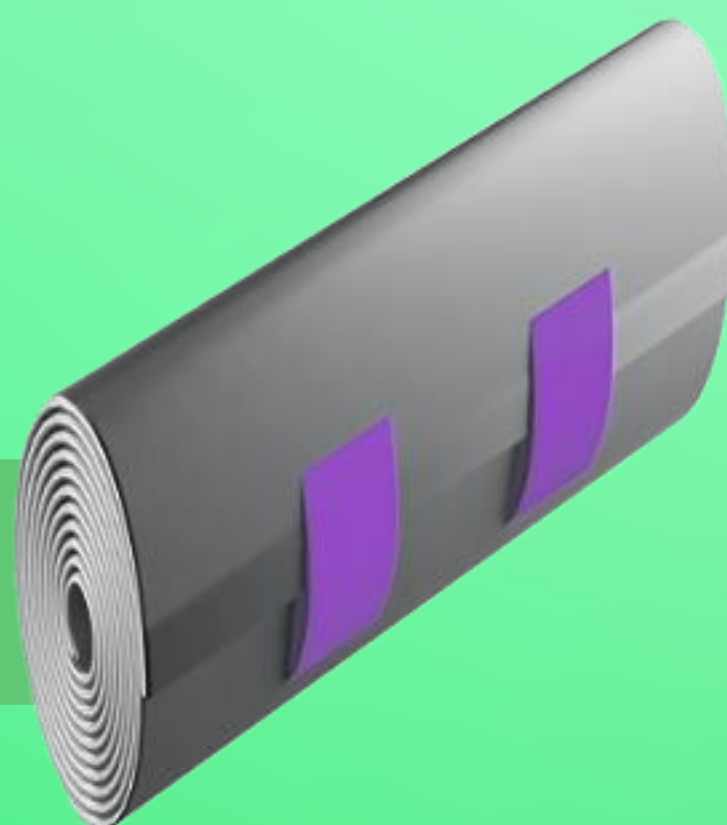

High bonding performance

Converting in different shapes

Electrical insulation outside of the cell

Fixation and protection inside of the cell
